#### INSULATE

- |  |  |
|--|--|
| 1. Ceilings (attic floors and cathedral) | 5. Slab-on-Grade (edge and under)              |
| 2. Above Grade Walls                     | 6. Heating and Cooling Ducts (non-conditioned) |
| 3. Conditioned Basement Walls            | 7. Attic / Knee Wall                           |
| 4. Framed Floor                          |  |

#### INSTALL

- |                                    |  |
|------------------------------------|--|
| 8. Damper on Exhaust Fan Vent      | 13. Hi-Low Attic / Roof Ventilation  |
| 9. Continuous Wall Vapor Barrier   | 14. Energy Efficient Windows (double pane, low-E, etc.)                        |
| 10. Continuous Floor Vapor Barrier | 15. Energy Efficient Doors (solid wood, foam core, etc.)                       |
| 11. Crawl Space Ground Cover       | 16. Weathersealing (caulk, sill plate sealer, etc.)                            |
| 12. Crawl Space Ventilation        | 17. Energy Efficient Heat Pump (high SEER and HSPF ratings, etc.)              |
|                                    | 18. Energy Efficient Electric Water Heater (high energy factor)                |
|                                    | 19. Energy Efficient Fireplace (backdraft damper, sealed combustion-air, etc.) |
